

About SolarLink

SolarLink brings 10 years experience in Solar design & installation plus 20 years electrical contracting & project management to ensure high quality workmanship for our commercial solar installations. We place high importance on OH&S and regulatory compliance for a secure & successful Power Purchase Agreement.

Our partners at **Soly Pty Ltd** provide renewable energy analysis & billing. We utilise Soly's renewable energy engineering resources to design reliable & profitable solar PV systems. Their technical & financial analysis allows us to remove the risks of commercial scale solar PV investment for our clients. Soly's automated billing system complies with Australian Standards class 1 Metering via the 3G network to ensure accuracy.

Commercial Solar Power Solutions

Power Purchase Agreement (PPA)

What is a Power Purchase Agreement? (PPA)

Rather than buying a solar PV system upfront, Solarlink finances and builds the system on your available roof space at zero (\$0) cost to you.

The power generated by the solar system will be sold to you via our billing partner (Soly Pty Ltd) at up to 25% discount compared with your current electricity tariff.

As retail electricity prices increase your savings will increase accordingly, meanwhile the PPA electricity price is not affected.

Detailed Analysis

Complete system design & financial analysis is completed by Soly Pty Ltd. System design is based on your electricity bills over the last 2-3 years along with interval data provided from your energy retailer. This customized approach gives Soly the ability to accurately design the system for optimal power generation resulting in real savings for end customers.

The Offer

For the Customer:-

- ☀️ Zero cost to you (\$0)
- ☀️ Up to 25% discount on electricity costs (save \$\$\$)
- ☀️ \$0 ongoing maintenance costs
- ☀️ \$0 insurance & liability costs
